Hindi Reader Project

This is a program to helps a Hindi language-learner practice reading Hindi text in the Devanagari script.

Use Cases

1. **Hindi texts** - user is provided with a choice of Hindi documents to read, and choosing one outputs that document in Devanagari.

2. **Hindi to English translation** - user can input a Devanagari word from the document (using copy/paste) and the output is an English translation of the word.

Future Use Cases

1. **Click to translate** - user can click on a Hindi word in the Devanagari document and the output is an English translation of the word.

2. **English to Hindi word translation** - user can input an English word related to the text and the output is a Hindi translation of the word.

3. **Flexible Hindi texts** - user can input a Devanagari document and a reader version (with one-word-at-a-time translation) is provided.
